Student Name	Navendhiran C
Project Name	Book a Doctor – Online Medical Appointment Platform
Maximum Marks	2 Marks

Problem – Solution Fit

Problem-Solution Fit checks that the problem we've identified for Book a Doctor's users is genuine, and that the proposed solution actually solves it. It helps the team notice the behavior patterns already in place around booking appointments, and confirms why a MERN-based booking platform is the right approach.

Purpose

- Address the appointment-booking problem in a way that matches how patients and doctors already behave.
- Increase adoption by tapping into channels patients and doctors already use (search, referrals, clinic touchpoints).
- Tighten onboarding messaging around the triggers that matter (illness, prescription renewal, referrals).
- Build trust by solving frequent, urgent, and costly scheduling problems for both patients and doctors.

Get a clear picture of today's manual booking process so it can be improved for patients, doctors, and admins.

Problem – Solution Fit Canvas

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

Patients (18–65) in need of medical care; doctors handling their own consultations; admins who verify doctors and run the platform

6. CUSTOMER CONSTRAINTS — CC

Limited digital literacy among older patients; low trust in online booking; time pressure; inconsistent internet/device access

5. AVAILABLE SOLUTIONS — AS

Calling to book by phone, walk-in queues, generic health apps (e.g. Practo), WhatsApp booking groups — all slow, fragmented, with no real-time sync

Explore AS, differentiat

Focus on J&P, understand

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

Find & book a qualified doctor quickly; manage doctor schedules without conflicts; verify doctor credentials before listing

9. PROBLEM ROOT CAUSE — RC

No centralized digital platform connecting patients, doctors & admins; scheduling is still done via manual calls and paper logs

7. BEHAVIOUR — BE

Patients repeatedly call clinics and search Google; doctors track bookings in manual registers; admins check doctor credentials via email and documents

Extract BE insights

Identify strong TR & EM

3. TRIGGERS — TR

A sudden illness or symptom, needing a prescription renewed, a referral, or wanting a specialist

10. YOUR SOLUTION — SL

Book a Doctor — a MERN-based platform offering role-based access for patients, doctors, and admins, live slot booking, secure document uploads, JWT-based authentication, and admin verification of doctors.

8.1 ONLINE — CH

Search engines, app stores, social media referrals, doctor/clinic websites

4. EMOTIONS: BEFORE/AFTER — EM

Before: anxious, frustrated;
After: relieved, confident (with a reliable platform)

8.2 OFFLINE — CH

Reception desks at clinics, word-of-mouth, printed pamphlets, walk-in clinic visits

Extract online & offline CH
