User Acceptance Testing (UAT) Report

Date	31 July 2026
Student Name	Navendhiran C
Project Name	Book A Doctor
Maximum Marks	4 Marks

Project Overview

Project Name: Book A Doctor
Project Description: A web-based healthcare booking system where patients can look up physicians, view open time slots, schedule/change/cancel appointments, pay consultation fees online, and get automated reminders; physicians handle their calendars and view booked patients from a dedicated portal.
Project Version: 1.0.0
Testing Period: 25 July 2026 to 30 July 2026

Testing Scope

- Patient sign-up, authentication, and profile updates.
- Doctor lookup with filters for specialty, city/pincode, and open slots.
- Scheduling, rescheduling, and cancelling appointments.
- Secure online fee payment and digital receipt generation.
- Booking confirmations and reminder alerts via SMS, email, and push notification.
- Physician-facing dashboard for calendar management and patient booking visibility.

Testing Environment

URL/Location: https://bookadoctor-staging.example.com
Credentials (if required): Test Patient – patient_test@example.com / Test@1234 | Test Doctor – doctor_test@example.com / Test@1234

Test Cases

ID	Scenario	Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Patient sign-up & login	1. Launch the application 2. Fill in name, email, phone, password 3. Submit the sign-up form	New account is created and the patient is signed in automatically	Account created and login successful	**Pass**
TC-002	Doctor lookup by specialty/location	1. Navigate to the search page 2. Type a specialty (e.g., Dermatologist) 3. Enter a city or pincode	A list of matching doctors appears with ratings and consultation fees	Correct doctors returned as expected	**Pass**
TC-003	Check doctor's open slots	1. Open a doctor's profile 2. Go to the 'Book Appointment' section 3. Review available time slots	Open slots for the upcoming 7 days are displayed	Slots rendered correctly	**Pass**
TC-004	Schedule an appointment	1. Pick an open slot 2. Verify patient details 3. Tap 'Confirm Booking'	Booking is created and a confirmation alert is sent to the patient	Booking confirmed; SMS and email received	**Pass**
TC-005	Pay consultation fee online	1. Move to payment after booking 2. Enter card information 3. Submit the payment	Transaction completes successfully and a digital receipt is issued	Payment intermittently declined on valid cards	**Fail**

ID	Scenario	Steps	Expected Result	Actual Result	Pass/Fail
TC-006	Cancel or reschedule a booking	1. Open 'My Appointments' 2. Choose the booked appointment 3. Tap 'Cancel' or 'Reschedule'	Appointment updates accordingly and a refund is triggered where applicable	Cancellation handled correctly	**Pass**
TC-007	Doctor edits calendar (Dashboard)	1. Doctor signs into the dashboard 2. Opens 'Manage Availability' 3. Adds or blocks time slots	Availability changes reflect for patients right away	Slot changes applied and visible to patients	**Pass**

Bug Tracking

Bug ID	Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Payment gateway intermittently rejects valid cards	1. Book an appointment 2. Pay using a valid card 3. Observe the failure	High	In Progress	Add retry logic and clearer failure messaging for users
BG-002	Reminder notifications arrive later than expected	1. Book an appointment 2. Wait for the reminder 3. Record delivery time	Medium	Open	Investigate queue processing delays in the notification service
BG-003	Same slot could be booked by two patients (double-booking)	1. Two patients attempt to book the identical slot 2. Both bookings go through	High	Closed	Resolved via conditional write at the database layer; verified in staging

Notes

- Cover both positive and negative paths across all test cases.
- Testers should note detailed observations, including improvement suggestions.
- Every logged bug should record severity, current status, and reproduction steps.
- Get sign-off from the project manager and product owner ahead of any deployment.
